

Distribution of hydropower projects (HPPs) in Slovenia

Initially, hydropower development in Slovenia started on the rivers Drava and Soča. However, in recent years some projects were implemented on the Sava and many more are planned to complete the chain.

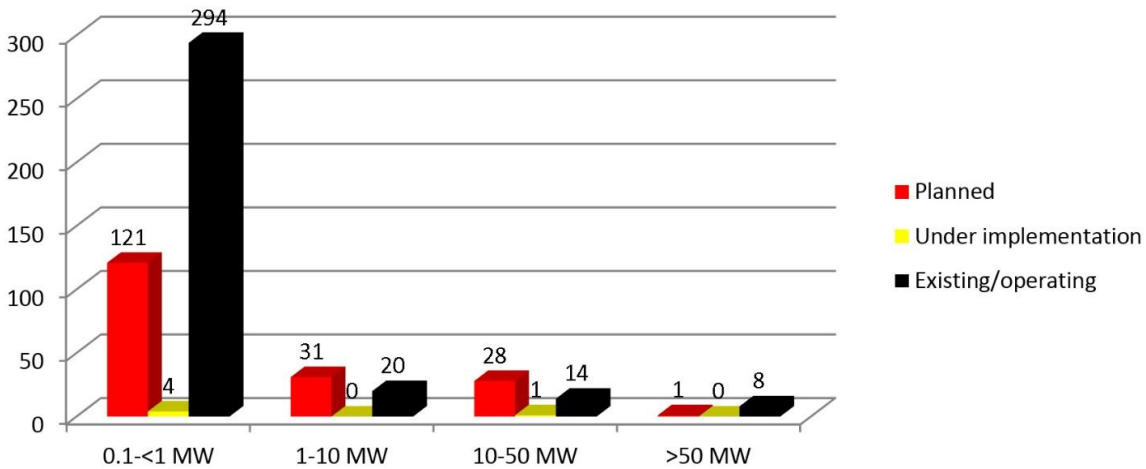

Figure 1: Distribution of hydropower plants for Slovenia.

Of the 714 existing HPPs in the entire Balkan region, 336 (47 per cent) are located in Slovenia. Find below the country distribution.

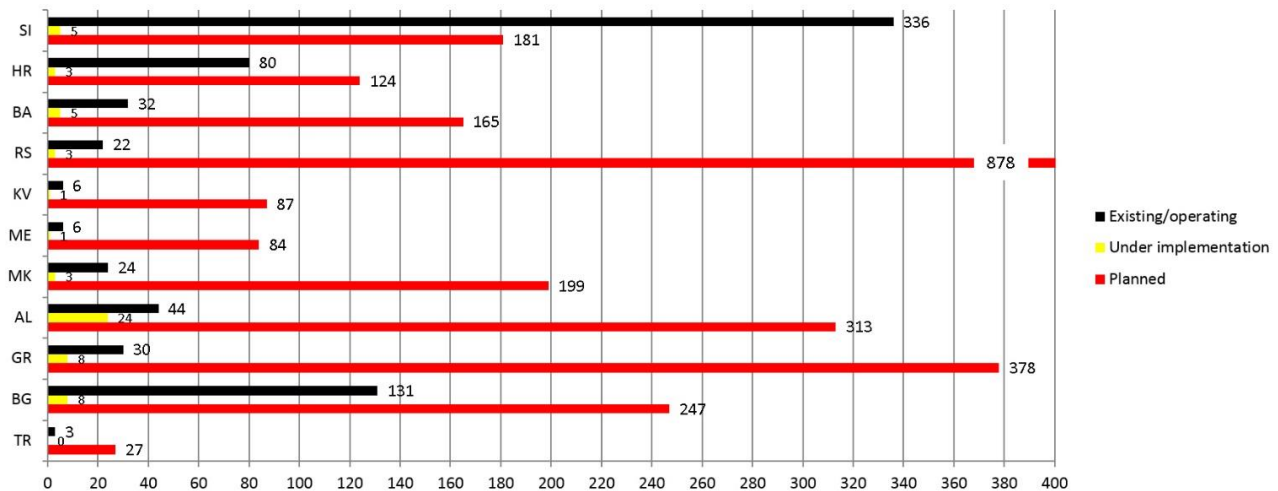

Figure 2: Country distribution of hydropower plants for entire Balkan region
